

# ADAPTATION OF FORESTS TO CLIMATE CHANGE. ACTION ON THE GROUND AND OPPORTUNITIES FOR INNOVATIVE FINANCING INSTRUMENTS

**DATE: DEC. 10 / TIME: 13:15-14:45 / VENUE: ROOM 4**

Multi-functional forests are struggling to adapt to rapidly changing local climatic conditions. Storms, droughts, forest fires, and pests can reinforce each other, increasing risks of tree death and forest dieback in many eco-regions around the globe.

This side event will showcase forest adaptation plans from Chile and Switzerland and discuss options for innovative capital market instruments (bonds and insurance) to bring in targeted finance to increase the climate resilience of forest ecosystems.

## SPEAKERS

FOEN, SWITZERLAND / CONAF, CHILE /  
PARHELION UNDERWRITING /  
CLIMATE BONDS INITIATIVE /  
PRIVATE SECTOR PANEL: SWISS-RE, MUNICH-RE,
